

# Future Matters

## ClearPath Briefing – Management Update and OS2200 Best Practice Workshop (Club 2200)

Stockholm, Sweden, 15th October 2009

08:45 Registration / Coffee

**09:30 Welcome and Introductions**

Overview of objectives and agenda for the day.

**09:40 ClearPath Business and Strategy Overview – Bob Tillotson, Vice President, ClearPath Worldwide Sales**

2008 was a successful year for ClearPath, both in terms of business performance and new product introductions, demonstrating on-going commitment to the programme. Bob reviews the key 2008 outcomes, and outlines the next steps in development of the business and product strategy.

**10:20 OS2200 / Dorado Programme Update – Ritva Haegeland, Marketing Manager, Unisys**

Ritva presents an overview of the Dorado introductions made during 2009. These include new Dorado platforms, new storage capabilities, and the key features introduced in OS2200 Release 12.0.

11:00 Break

**11:30 Customer Presentation**

Each year, customers recommit to ClearPath to support their core business applications. This client presentation will cover the business situation, the alternatives considered, the reasons for their decision to continue with Unisys, and the benefits delivered in their new solution.

**12:10 Supporting the Olympics with ClearPath – Jim Malnati, Operations Consultant, Unisys**

The story of how Unisys provided TravelSky with the platform to successfully handle the business volumes for the 2008 Beijing Olympics. Faced with phenomenal growth and huge transactional volumes, automation was the only option to support the workload and deliver the service. Jim describes the advanced disaster recovery, workflow management, and shared component automation implemented at TravelSky and other clients worldwide.

12:45 Lunch

**13:45 OS2200 Best Practice Workshop**

**Workload Management** - a demonstration of the workload management interfaces for latest Dorado servers, how to configure and manage speciality engines for JAVA or MQ Processing, and an introduction to Dorado 4000 High Availability capabilities.

**Single Point of Operations** - a demonstration of the latest release of Operations Sentinel, with examples showing how it can be used for monitoring remote SRDF links, and to manage tape capacities in a virtual tape environment.

**Data Management and Storage** - An overview of the Unisys portfolio including Primary Storage, Virtual Tape Libraries and enhancements to Business Continuity. This will also include a discussion of the Virtual Tape solution implemented in the Alingsås Outsourcing Centre.

15:30 Break

**16:00 Operations Automation** - a demonstration of OpCon showing easy steps to automate activities and set up alerts in response to events. Jointly delivered by SMA and a client.

**Enhanced Security Profiles** - how to configure and use security profiles to strengthen protection for ClearPath applications and data.

**17:30 Workshop Close / Reception Commences**

Cocktails and canapés to allow you to discuss further the programme content and network with colleagues, Unisys and partner representatives.

19:00 Close

## Venue

Clarion Hotel Sign is located in the heart of Stockholm city, right next to the Central station and the Arlanda Express airport train. The area is currently undergoing significant change. Around Torsgatan and the Central station a new city district is emerging, complete with green areas, offices, apartment buildings and the new Clarion Hotel Sign with distinct architectonic features.

Clarion Hotel Sign, Östra Järnvägsgatan 35, Box 310, 101 26 Stockholm, Sweden, Tel : +46 (0)8 676 98 00, [www.clarionsign.com](http://www.clarionsign.com)
