

Future Matters

Best Practice Workshop : Advanced Technologies for MCP

Brussels, September 30th 2009

In 2009 we changed our Future Matters format with single day management ClearPath Briefings - held in UK, Belgium and France – our last 2009 event will be in Stockholm October 15th focused on OS2200 technologies. We also introduced Technology Updates with EAE / Agile Business Suite user events (one further event takes place in Paris October 13th) and now Best Practice Workshops – for both the OS2200 and MCP environments.

Advanced Operations and Integration for ClearPath MCP – Best Practice Workshop.

Please join us at the Center for Innovation, Unisys Belgium on 30th September for a practical and informative workshop for MCP clients.

Who should attend, and why?

With a strong emphasis on practical advice these workshops are designed for technical operations and application specialists. You'll hear and see how to make new ClearPath features work for you – based on demonstrations. See how you can use Workload Management capabilities to automatically ensure SLAs are met, how OpCon can be used to automate workflow and operations, and how E-Portal provides access to MCP systems and applications through web services and PDA devices – like iPhone.

No death by PowerPoint! You'll see solutions in action and return to your business with ideas and information you can put to use immediately. So, we will maximise the use of demonstrations and discussions, and keep presentation material to a minimum. Take advantage of this free consultancy opportunity – ensure all your colleagues are aware of this open invitation.

Where and When?

The workshop will be held at the Center for Innovation Unisys Brussels, starting at 10:00 and running through to 16:00. At the end of the workshop session you may leave, or join us for refreshments and further individual discussions with consultants and partners. We would like to discuss the ideas you have seen and how Unisys can help you implement these solutions in your organisation.

Workshop content

09:30 Arrivals/Coffee

10:00 **Workshop Commences:** (coffee/comfort breaks as required)

Introduction - Overview of latest Software Release Announcement

Operations Automation – a demonstration by SMA of OpCon showing easy steps to automate activities and set up alerts in response to events. SMA will be accompanied by a client to discuss their experience.

Workload Management for MCP – a demonstration to show how to establish SLAs and how Workload Management ensures priorities are managed to bring SLAs back into compliance.

12:45 Lunch

13:30 **Workshop recommences:** (coffee/comfort breaks as required)

Ensuring Security Compliance – a demonstration by Locum of the SafeSurvey and SecureAudit products integrated with MCP to monitor and audit security within the system.

Business Continuity Accelerator - an overview of the new capabilities for application failover, showing how to establish the monitoring and failover scenarios, and walk through the re-establishment of the applications

E-Portal – an introduction to the architecture and process for modernisation, followed by a demonstration of how to build, compile and run (using Visual Studio) and deploy a modernised web and mobile user interface to MCP applications.

16:00 Refreshments, 1:1 discussions

17:00 Departures / Close

How to register and find further information
